Thanks for the cheat sheet! You might want to add the `:html equality` test option. It's similar to the `:text equality` test, but matches html (see [http://blog.gorgorg.org/articles/2007/01/22/assert\\_select-lets-you-specify-the-html-content-of-a-tag](http://blog.gorgorg.org/articles/2007/01/22/assert_select-lets-you-specify-the-html-content-of-a-tag)).

## assert\_select cheat sheet at random

[...] Voor de Railzers onder ons, er is een “cheat sheet” voor assert\_select. Assert\_select laat je toe de responses van je applicatie te testen op de inhoud (er moet een “div” zijn, er moet een “title” zijn, maar ook “er moet een div met daarin 2 tables, zijn, met een row in de tweede table die als Id xxx heeft, en inhoud yyy”). Zie deze link. [...]
